

CSS Form Styling

Form Styling

Forms are an essential part of web applications, enabling users to input and submit data. However, default form styles vary across browsers, making it important to style them consistently using CSS.

1. Basic Styling of Form Elements

```
input, textarea, select, button {  
  font-size: 16px;  
  padding: 10px;  
  border: 1px solid #ccc;  
  border-radius: 5px;  
}
```

2. Styling Input Fields

```
input[type="text"], input[type="email"], input[type="password"]{  
  width: 100%;  
}  
input:focus {  
  border-color: #0056b3;  
}
```

Form Styling

3. Placeholder Styling

```
input::placeholder {
  color: #aaa;
  font-style: italic;
}
```

4. Customizing Checkboxes and Radio Buttons

```
input[type="checkbox"], input[type="radio"] { display: none; }
input[type="checkbox"] + label, input[type="radio"] + label {
  display: inline-block; padding-left: 30px; position: relative; cursor: pointer;
}
input[type="checkbox"] + label::before, input[type="radio"] + label::before {
  content: ""; width: 20px; height: 20px; border: 2px solid #007bff; background: white; position: absolute;
  left: 0; top: 2px; border-radius: 50%;
}
input[type="checkbox"] + label::before {border-radius: 0}
input[type="radio"]:checked + label::before { background: #007bff;}
```

Form Styling

5. Styling Select Box

```
select {
  appearance: none; cursor: pointer;
  background: #fff url('./images/down-arrow.png') no-repeat 94% center/25px; padding-right: 35px;
}
```

6. Customizing Form Validation Styles

```
input:invalid {
  border-color: red;
}
input:valid {
  border-color: green;
}
```
